P1.0 printing, April 2010

Version: 2010-4-5

Contents

1	Introduction	17
1.1	Moving In	17
1.2	Learning the Language	20
1.3	Installing the Tools	21
1.4	Exploring the Frameworks	22
1.5	In This Book	23
2	Using What's There	26
2.1	Creating Your Project in Xcode	27
2.2	Creating the Appearance with Interface Builder	28
2.3	Testing the Interface with the Cocoa Simulator	33
2.4	Finishing the Interface	35
2.5	Wiring Up the Components	37
2.6	Fixing the Build	41
2.7	Sharing Your Browser	43
2.8	Exercise: Rinse and Repeat	44
2.9	The Nib File	45
3	Methods and Parameters	50
3.1	Sending Messages Without Arguments	50
3.2	Reading the Docs	52
3.3	Methods with Arguments	55
3.4	Dynamic Binding	58
3.5	Problems Sending Messages	59
3.6	Links Back to Yourself	60
3.7	Exercise: Multiple Connections	61
4	Classes and Objects	64
4.1	Creating "Hello, World!"	64
4.2	Logging Output to the Console	65
4.3	Using an Existing Class	68
4.4	Refactoring Code	71
4.5	Creating a New Class	74

4.6	Creating and Using a Class Method	77
4.7	Creating a New Object	78
4.8	Further Refactoring	80
4.9	Initializing Your Objects	81
4.10	Logging Objects	84
4.11	Exercise: Other Initializations	85
4.12	Solution: Other Initializations	86
5	Instance Variables and Properties	88
5.1	Pointers	89
5.2	Working with Nonobject Types	90
5.3	Getters and Setters	91
5.4	Converting the Accessors to Properties	94
5.5	Dot Notation	95
5.6	Property Attributes	98
5.7	Exercise: Adding Properties	100
5.8	Solution: Adding Properties	101
5.9	Removing Instance Variables	102
6	Memory	104
6.1	Reference Counting	105
6.2	Finding Leaks with the Clang Static Analyzer	106
6.3	Fixing the Memory Leak on Mac OS X	108
6.4	Properties and Garbage Collection	109
6.5	Creating a Flashlight	111
6.6	Finding Leaks in Instruments	113
6.7	Fixing the Memory Leak on the iPhone	114
6.8	Using Zombies	115
6.9	Cleaning Up in dealloc	117
6.10	Retain and Release in a Setter	118
6.11	The Autorelease Pool	119
6.12	Using Convenience Constructors	122
6.13	Exercise: Creating and Using a Convenience Constructor	123
6.14	Solution: Creating and Using a Convenience Constructor	124
7	Outlets and Actions	126
7.1	The Big Picture	127
7.2	Using an Outlet	127
7.3	Exercise: Creating and Using an Outlet	130
7.4	Solution: Creating and Using an Outlet	131
7.5	Declaring an Action	132
7.6	Connecting and Implementing the Action	135

7.7	Exercise: Hiding the Button	137
7.8	Solution: Hiding the Button	137
7.9	Exercise: Toggling the Interface	138
7.10	Solution: Toggling the Interface	138
7.11	Introducing Another Outlet	139
7.12	Creating Selectors from Strings	141
8	Creating a Controller	143
8.1	How We've Created Objects	143
8.2	Creating Our Controller Class	145
8.3	Creating an Instance of Our Controller in IB	146
8.4	Declaring an Outlet and an Action	148
8.5	Forward Declaration	151
8.6	Wiring Up the Controller	152
8.7	Implementing the Loading of the Previous Page	152
8.8	Exercise: Finishing the Controller	152
8.9	Solution: Finishing the Controller	153
8.10	Awake from Nib	154
8.11	Disabling and Enabling the Buttons	155
8.12	Still Needs Work	158
9	Customizing with Delegates	160
9.1	Understanding Delegates	160
9.2	The Default Window Behavior	164
9.3	Turning the Background Red	164
9.4	Exercise: Turning the Background Green	167
9.5	Solution: Turning the Background Green	167
9.6	Application Delegate	167
9.7	Delegates for Your Web View	168
9.8	Setting the Window Title	169
9.9	Exercise: Updating the URL and Setting Buttons	171
9.10	Solution: Updating the URL and Setting Buttons	172
9.11	Cleaning Up	172
9.12	Exercise: Adding a Progress Indicator	175
9.13	Solution: Adding a Progress Indicator	175
10	Adapting Our Browser to the iPhone	177
10.1	Creating the iPhone Project	177
10.2	Creating the Look of Our Browser	179
10.3	The WebView's Limitations	180
10.4	Loading a Web Page at Launch	181
10.5	Tweaking the Text Field in IB	183

10.6	Using the Text Field Delegate	185
10.7	Using a Third Delegate to Implement the Buttons . . .	186
10.8	Exercise: Adding an Activity Indicator	187
10.9	Solution: Adding an Activity Indicator	188
10.10	Organizing with Pragma Marks	190
11	Posting and Listening for Notifications	193
11.1	Exercise: Creating a Model	194
11.2	Solution: Creating a Model	194
11.3	Registering for Notifications	196
11.4	Responding to Workspace Activity	197
11.5	Holding on to the Controller	199
11.6	Exercise: Registering for Notifications	200
11.7	Solution: Registering for Notifications	200
11.8	Posting Notifications	201
11.9	Exercise: Receiving the Custom Notifications	203
11.10	Solution: Receiving the Custom Notifications	203
12	Creating Protocols for Delegation	205
12.1	Exercise: Creating and Setting the Delegate	206
12.2	Solution: Creating and Setting the Delegate	206
12.3	Creating and Using a Protocol	207
12.4	Requiring Methods	209
12.5	Responding to Selector	210
12.6	Exercise: Calling the Delegate Methods	210
12.7	Solution: Calling the Delegate Methods	211
12.8	Exercise: Cleaning Up	211
12.9	Solution: Cleaning Up	211
13	Working with Dictionaries	215
13.1	Looking at the User Info	215
13.2	Reading from a Dictionary	216
13.3	Exercise: Displaying the Name	217
13.4	Solution: Displaying the Name	217
13.5	Reducing Redundancy	218
13.6	Using a Dictionary for Flow Control	220
13.7	Adding and Removing Entries with a Mutable Dictionary	220
13.8	Exercise: Adding an Icon	223
13.9	Solution: Adding an Icon	225

14 Multiple Nibs	229
14.1 Methods, Objects, and Nibs	229
14.2 Splitting Nibs	231
14.3 Preparing to Split Out the View	233
14.4 Creating the View Nib	234
14.5 Integrating a Nib File	235
14.6 The File's Owner	237
14.7 Exercise: Loading the View	238
14.8 Solution: Loading the View	239
14.9 Creating the Window Nib	239
14.10 Loading the Window Nib	241
14.11 Presenting the Window	242
14.12 Exercise: Connecting the View and the Model	242
14.13 Solution: Connecting the View and the Model	243
15 Creating Custom Views	245
15.1 Creating a Custom View	245
15.2 Drawing Shapes into a Custom View	247
15.3 Exercise: Changing the Stroke Color	250
15.4 Solution: Changing the Stroke Color	250
15.5 Drawing Images	252
15.6 Drawing Text	254
16 Displaying Data in a Table	258
16.1 Tables and Data Sources	258
16.2 Exercise: Implementing a Basic Data Source	261
16.3 Solution: Implementing a Basic Data Source	262
16.4 Exercise: Introducing a Data Source	263
16.5 Solution: Introducing a Data Source	264
16.6 Filling Cells Based on Table Column Titles	265
16.7 Table Column Identifiers as Keys	267
16.8 Previews of Coming Attractions	268
16.9 Exercise: Adding and Removing Rows	268
16.10 Solution: Adding and Removing Rows	269
16.11 Manually Removing Rows	270
17 Saving Data to Disk	272
17.1 Saving in Your Running Application	272
17.2 Where to Put Application Support	275
17.3 Saving to a Plist	276
17.4 Reading a Plist	277

17.5	Saving an Archive to Disk	278
17.6	Reading and Using Preferences	280
17.7	Setting the Factory Defaults	280
17.8	Preparing to Set User Defaults	282
17.9	The Preference Window Nib	283
17.10	Enabling the Preferences Window	285
18	Changing Views	287
18.1	Working with Radio Buttons	287
18.2	Adding Preferences for View at Launch	289
18.3	Exercise: Launching with the Right View	290
18.4	Solution: Launching with the Right View	290
18.5	Eliminating Magic Numbers	292
18.6	Customizing the Menu Bar	294
18.7	Moving the Main Window	295
18.8	Exercise: Switching Views (Mostly)	296
18.9	Solution: Switching Views (Mostly)	296
18.10	Lazy Initialization	298
19	Key Value Coding	300
19.1	Treating Objects Like Dictionaries	301
19.2	Getting Variables Using KVC	303
19.3	Undefined Keys	305
19.4	Exercise: Setting Variables Using KVC	306
19.5	Solution: Setting Variables Using KVC	306
19.6	KVC and Dictionaries	307
19.7	Keypaths for Navigating a Class Hierarchy	308
19.8	Exercise: Filling Tables Using KVC	311
19.9	Solution: Filling Tables Using KVC	311
19.10	Arrays and KVC	313
20	Key Value Observing	316
20.1	Codeless Connections	316
20.2	A Target-Action Counter	318
20.3	Introducing an Observer	320
20.4	Registering an Observer	322
20.5	Making Changes Observable	323
20.6	Observing the Changes	325
20.7	Exercise: Adding a Second Observer	326
20.8	Solution: Adding a Second Observer	326
20.9	The Ugly Way to Observe More Than One Attribute	327

20.10	Selecting Methods Using KVC	330
20.11	Implementing an Observer Object	331
20.12	Updating Dependent Variables	333
21	Cocoa Bindings	336
21.1	The Model and View for Our Counter with Bindings	337
21.2	Creating and Connecting the NSObjectController	337
21.3	Binding More Objects	340
21.4	Number Formatters	341
21.5	Exercise: Connecting Two Counters with Bindings	343
21.6	Solution: Connecting Two Counters with Bindings	344
21.7	The Model for Our Bookshelf Example	346
21.8	Creating the View for the Bookshelf	347
21.9	Binding with the NSArrayController	348
21.10	The Big Finish	351
22	Core Data	352
22.1	Entities and Attributes	353
22.2	Using the Core Data Widget	354
22.3	The Managed Object Context	356
22.4	The Persistence Layer	358
22.5	Introducing Relationships	360
22.6	Choosing a Relationship's Delete Rule	362
22.7	Updating the View	363
22.8	Managing Dependencies	364
22.9	Exercise: Enabling Author Addition and Removal	365
22.10	Sorting	365
22.11	Filtering Items	367
22.12	Coding the Sort Descriptor	368
23	Categories	370
23.1	Overcoming Limitations	370
23.2	Creating a Category	371
23.3	Category Cautions	373
23.4	Private Methods in Class Extensions	374
23.5	Exercise: Extending Properties with Class Extensions	377
23.6	Solution: Extending Properties with Class Extensions	377
23.7	Categories and Core Data	378
23.8	Generated Classes in Core Data	380
23.9	Accessing Properties	381
23.10	Regenerating Class Files from Entities	382

24 Blocks	385
24.1 The Need for Blocks in Wrappers	386
24.2 Declaring a Block	387
24.3 Using Blocks in Wrappers	388
24.4 Capturing Values	389
24.5 Blocks and Collections	391
24.6 Declaring, Defining, and Using Blocks	392
24.7 Using <code>__block</code>	394
24.8 Cleaning Up with <code>typedef</code>	395
24.9 Exercise: Using Blocks in Callbacks	396
24.10 Solution: Using Blocks in Callbacks	398
25 Operations and Their Queues	400
25.1 Making the Beach Ball Spin	400
25.2 Invocation Operations	402
25.3 Block Operations	404
25.4 Interacting with the <code>Queue</code> and Operations	405
25.5 Custom <code>NSOperations</code>	408
25.6 From Operation <code>Queues</code> to Dispatch <code>Queues</code>	410
26 Dispatch Queues	414
26.1 When to Use Dispatch <code>Queues</code>	414
26.2 Quick <code>Queue</code> Overview	416
26.3 Drawing Our Fractal	417
26.4 Working Without Dispatch <code>Queues</code>	418
26.5 The Main <code>Queue</code>	420
26.6 Global Concurrent <code>Queues</code>	421
26.7 Synchronizing on the Main <code>Queue</code>	422
26.8 Private Dispatch <code>Queues</code>	423
26.9 Synchronous Tasks	424
27 Up and Out	428
27.1 But What About...	428
27.2 What's Next	429
27.3 Acknowledgments	430
27.4 Dedication	431
A Bibliography	433
Index	436

The Pragmatic Bookshelf

The Pragmatic Bookshelf features books written by developers for developers. The titles continue the well-known Pragmatic Programmer style and continue to garner awards and rave reviews. As development gets more and more difficult, the Pragmatic Programmers will be there with more titles and products to help you stay on top of your game.
