# The Accessible Web

Creating  
Content  
for Everyone

*Jeremy J. Sydik*

# Beta Book

Agile publishing for agile developers

The book you're reading is still under development. As an experiment, we're releasing this copy well before we normally would. That way you'll be able to get this content a couple of months before it's available in finished form, and we'll get feedback to make the book even better. The idea is that everyone wins!

Be warned. The book has not had a full technical edit, so it will contain errors. It has not been copyedited, so it will be full of typos. And there's been no effort spent doing layout, so you'll find bad page breaks, over-long lines, incorrect hyphenations, and all the other ugly things that you wouldn't expect to see in a finished book. We can't be held liable if you use this book to try to create a spiffy application and you somehow end up with a strangely shaped farm implement instead. Despite all this, we think you'll enjoy it!

Throughout this process you'll be able to download updated PDFs from <http://books.pragprog.com/titles/jsaccess/reorder>. When the book is finally ready, you'll get the final version (and subsequent updates) from the same address. In the meantime, we'd appreciate you sending us your feedback on this book at <http://books.pragprog.com/titles/jsaccess/errata>.

Thank you for taking part in this experiment.
