1	Introduction	17
1.1	How to Read This Book	18
1.2	Acknowledgments	19
1.3	Sharing	20
2	An Ubuntu Administration Crash Course	21
2.1	The Ubuntu Desktop	22
2.2	Users, Passwords, and Files	24
2.3	Command Line or GUI?	27
2.4	Software Installation and Management	38
2.5	Using gconf-editor	52
2.6	Editing Configuration Files	53
2.7	Making and Keeping Backups	55
2.8	Rescue Me! What to Do If It All Goes Wrong	57
2.9	Miscellaneous Things You Ought to Know	59
3	The Tips	64
1.	Set Any Picture as Wallpaper with a Single Click	65
2.	See (and Reuse) the Most Recently Typed Commands	66
3.	Add Cool New Visualizations to Totem/RhythmBox	67
4.	Switch Monitor Resolutions with a Single Mouse Click	67
5.	Closely Monitor the Power Consumption of a Laptop	68
6.	Stop the Cursor from Blinking	68
7.	Scroll Without the Mouse in Firefox and Evolution Mail Windows	69
8.	Optimize Startup for Faster Boot Times	69
9.	Graph the System Bootup Performance	73
10.	Change Gedit's Printing Font	74
11.	Shrink or Enlarge Images at the Command Line	75
12.	View All a Digital Photo's Technical Information	76
13.	Have Ubuntu Speak to You	76
14.	Instantly Search for Files in Nautilus	77

15. Take Photos or Record Videos with Your Webcam	77
16. Add RAR File Compression Support to Ubuntu	78
17. Add a Swap File or Expand Existing Swap Space	78
18. Get Rid of the Virtual Console Legal Boilerplate	80
19. Make Wubi Installations of Ubuntu Run Faster	80
20. Make Website or Email Links Automatically Install Software	81
21. Make Fonts Look Superb	82
22. Download Updates Faster	83
23. Slow Down a Touchpad's Scrolling	84
24. Ensure Your Windows Partition Is Always Available Under Ubuntu	85
25. Improve the GNOME Terminal Look and Feel	86
26. Ensure Ubuntu Always Knows the Time	87
27. Get More Data onto CD-R Discs	87
28. Share Files Across the Network (Without Tearing Your Hair Out)	88
29. Save Ink When Printing	90
30. Browse the Web from the Command Line	91
31. Create an "Ubuntu Install" USB Stick	92
32. Add a Menu Entry for Ubuntu's Compression Tool	93
33. Quickly Run Applications Without Opening a Termi- nal Window	94
34. Instantly Search Google for Any Word or Phrase	94
35. Ensure You're Informed About the Newest Releases of Ubuntu	96
36. Create a File Delete Command That Uses the Trash	96
37. Configure Ubuntu's Firewall	97
38. Repair Windows from Within Ubuntu	102
39. Empty the Trash Even If Told You Can't	102
40. Log On Automatically After Bootup	103
41. Use an Alternative Wifi Connection Manager	103
42. Make Evolution More Like Outlook (Just a Little Bit)	105
43. Give Ubuntu a Static IP Address	106
44. Format a USB Memory Stick (or Camera Memory Card)	108
45. Protect Ubuntu So It Can't Be Booted Without a Pass- word	110
46. Dump the Text on a Virtual Console to a File	113
47. Eliminate the Time Period During Which sudo/gksu Powers Hang Around	114
48. Access Ubuntu Files from Windows	115

49. Kill a Crashed GUI	116
50. Make Ubuntu Safe for Children to Use	117
51. Run Two (or More) Desktops at the Same Time	120
52. Go Completely Full-Screen in Virtually Any Application	121
53. Make Calculator Round Up (or Down) to Two Digits . .	122
54. Follow the Moon's Phases	122
55. Import Internet Explorer Settings into Firefox	123
56. Drag and Drop Files onto the Terminal Window	123
57. Use Older Digital Cameras with Ubuntu	123
58. Use the Ultra-quick xterm to Bash Out Commands . .	125
59. Install All the Program Compilation Tools You'll Need .	125
60. Avoid Network Slowdowns and Incompatibilities	126
61. Print at the Command Line	127
62. Find the Ubuntu Version and Code Name	127
63. Get Your Webcam Working in Ubuntu	128
64. Downgrade to Firefox 2	128
65. Install All the Multimedia Playback Codecs You'll Ever Need	129
66. Get Better DVD Movie Playback	130
67. Run the Terminal with a Single Keypress	131
68. See the APT Cow	131
69. See What Firefox Plug-ins Are Installed	132
70. Kill the Network Connection Instantly	132
71. Post Blog Entries from your Ubuntu Desktop	132
72. Intelligently Select Only the Files You Want	133
73. Temporarily Disable a User Account	134
74. Take Complete Control of Desktop Effects and Anima- tions	135
75. Do Some Desktop Publishing	137
76. Control Volume Levels at the Command Prompt	137
77. Search the Ubuntu File System	138
78. Remove the "Bad Password" Wait Period	141
79. Make Desktop Icons Really Big	142
80. Run Ubuntu...Without the Linux Components!	142
81. Instantly Hide a File or Folder	143
82. Scan for Viruses	143
83. Temporarily Log In as the Root User at the Command Line	146
84. Start the Screensaver from the Command Line	147
85. Get the Most Out of (or into) a Nautilus Window	147
86. View Images at the Command Line	147

87. Administer the Printer from a Web Browser	148
88. Move a Window Without Clicking the Title Bar	148
89. Connect to Shared Folders from the Command Line	149
90. Deactivate Caps Lock	150
91. Format Floppies	151
92. Switch to a Lightweight File Manager	151
93. Use Syntax Highlighting in Gedit	153
94. Stop ZIP Files That Are Emailed to Colleagues from Getting Lost	154
95. Use an Alternative Email Client	154
96. Ensure People Hear You When Using a Microphone	156
97. Quickly Browse to a Location	156
98. Turn Off the Beep	157
99. Add a Second Hard Disk	157
100. Update Ubuntu in the Background	159
101. Install 465 Open Source Fonts	159
102. Be Careful Not to Badly Name Files/Folders in Your Windows Partition	160
103. Make Your Windows Partition Read-Only	160
104. Stop Nautilus from Neatly Arranging Icons	161
105. Run GUI Programs from a Terminal Window Without Tying Up Input	161
106. Set the CPU Speed from the Desktop	162
107. Switch to Kubuntu, Xubuntu, or Edubuntu Without Installing from Scratch	163
108. SSH into Ubuntu from Windows	163
109. Recover a Damaged Desktop	164
110. Recover a Damaged Desktop #2	164
111. Enable the Root User	164
112. Quickly Create Graphical Text Banners	165
113. Securely Erase Data	166
114. Play Emacs Games	168
115. Fix Video Playback Problems	168
116. Turn Any Text File into a PDF at the Command Line	168
117. Avoid Repetitive Strain Injury When Using Ubuntu	169
118. Uninstall Ubuntu	169
119. Network Ubuntu, Mac, and Windows ...Without Doing Anything	172
120. Access ISO Images As If They Were Disk Drives	172
121. Improve Ubuntu's Microsoft Office 2007 File Support	173
122. Use a Friendly Version of vim	174

123. Get Around Partitioning Errors If Using Boot Camp on Macs	174
124. Have Macs Correctly Refer to Ubuntu in Dual-Boot Mode	175
125. Sleep, Ubuntu, Sleep!	175
126. Instantly Create an HTML Slideshow of Photos	176
127. Reveal the Desktop	176
128. Set Hard Disk Power-Saving	177
129. View the GNOME Desktop Version	178
130. Avoid GNOME Startup Errors	178
131. Use FTP Under Ubuntu	179
132. Switch to Old-Fashioned Tree View in Nautilus	180
133. Kill Any Crashed Program	181
134. Increase the Number of Documents Remembered by Gedit	182
135. Utilize All of a Sound Card's Features	182
136. Monitor Network Speed	183
137. Make the Command Prompt Colorful	184
138. Make Windows Permanently Available	185
139. Give the Boot Menu Wallpaper	186
140. Access All Removable Storage from the Command Line	188
141. Reconfigure Your Graphics Card from the Ground Up .	189
142. Unlock the Package Database	190
143. Administer Ubuntu Using a Web Browser from Any Computer (or Operating System)	190
144. Give Nautilus Windows Their Own Wallpaper	193
145. Create an Encrypted File Store Accessible from Any Operating System	193
146. Find Out How Much Disk Space Is Available	197
147. Make Ubuntu Blue (or Dark Gray or Dark Brown) . . .	198
148. Use Versions of Ubuntu That Are Entirely Free Software	199
149. Install OpenOffice.org's Database Component	200
150. Monitor Your Computer's Temperature and Fan Speeds	200
151. Print Multiple Photos on One Sheet of Paper	201
152. Try Some Alternative Web Browsers	201
153. Quickly Hide/Unhide Windows Using the Keyboard . .	202
154. Convert Images from One Format to Another at the Command Line	203
155. Significantly Expand Gedit's Functionality	203
156. Make New Mail Windows Taller	204
157. Avoid Making Badly Burned CD-R/RW Discs	204

158. Import Email Messages from Outlook and/or Outlook Express	205
159. Use the Mac OS “Quit” Keyboard Shortcut	206
160. Switch to bash If sh Is in Use	206
161. Instantly Edit a File When You’re Viewing It in less	207
162. Access Ubuntu’s Desktop from Any Computing Device	207
163. Remove the Annoying Delay When Installing Firefox Extensions	208
164. View Technical Details of Your PC’s Hardware	208
165. Switch to Old-Fashioned “Spatial Browsing” Mode	209
166. Clear the Package Cache	210
167. Search man Pages	210
168. Convert a PDF to an Image	211
169. Use a Dial-Up Modem	211
170. Steal the Windows (or Mac OS) Fonts	212
171. Use Unusual Characters or Symbols	214
172. Encrypt and Sign Emails	215
173. Get a Nice Trash Can on the Desktop	219
174. Create .zip Files Using Maximum Compression	220
175. Create an Ubuntu “Updates” CD/DVD	220
176. Stop Ubuntu “Graying Out” Stalled Program Windows Quickly	222
177. Get a High-Quality (and Free) Command-Line Word Processor with Microsoft Word	222
178. Create a “Superuser Terminal” Shortcut	224
179. Find Out Who You Are!	225
180. Install Ubuntu Partner Software	225
181. Use a GUI Version of vim	226
182. Rescue a Crashed GUI	226
183. See a Quote of the Day Whenever You Log In	227
184. Make GNOME System Monitor Appear When Ctrl+Alt+Delete Is Hit	229
185. Change Your Computer’s Name (Hostname)	230
186. Reduce the Wubi Boot Delay	231
187. Swap Around the Minimize, Maximize, and Close Buttons	232
188. Add an Uber-Start Button to Ubuntu	232
189. View Technical Details of PDF Files	233
190. Connect to a Remote Computer As If You Were Sitting in Front of It	233
191. Change Ubuntu’s System Sounds	236

192. Move Around the Command Line Like a Pro	237
193. “Scroll” a Virtual Console	237
194. Do Math at the Command Line	238
195. Create Keyboard Shortcuts That Use the Windows Key	239
196. Create a Text File Without a Text Editor	240
197. Turn Off the OpenOffice.org Splash Screen	241
198. See Which Virtual Console You’re Working At	241
199. Periodically Change the Desktop Wallpaper	242
200. Get Warned When sudo Powers Hang Around	243
201. Add a “Similar Words” Sidebar to the Dictionary	243
202. Add Drop Shadows to Screenshots	244
203. Create a Backup ISO Image of Almost Any Physical CD/DVD	244
204. Change Firefox’s Spell-Checker Language	245
205. Take Full Control of PulseAudio Sound Output	245
206. Use the Command Prompt to Sleep, Hibernate, Shut Down, or Reboot	246
207. Mirror Commands and Output Across Different Ter- minal Windows	247
208. Instantly View a Load of Images as a Slideshow	248
209. Use a Windows-Style Start Button and Taskbar	249
210. Change Your Password	251
211. Convert Hex to Decimal (and Vice Versa)	251
212. Quickly Save Pictures on Websites	253
213. Quickly Send Web Links by Email	253
214. Sharpen Images at the Command Line	254
215. View PDFs at the Command Line	255
216. Run Windows Programs Under Ubuntu	255
217. Uninstall Ubuntu If Wubi Has Been Used	257
218. See a Visual Representation of File and Folder Locations	258
219. Create Text Banners	259
220. Use a Macintosh OS X-like Dock	261
221. Process Words at the Command Line	262
222. View a Calendar at the Command Prompt	263
223. Repair Ubuntu File System Errors	264
224. Clone Your Ubuntu Installation onto a New Hard Disk	265
225. Create a Boot Log to Help Solve Startup Problems	269
226. Install a Personal FTP Server for File Sharing	270
227. Shut Down, Reboot, Hibernate, or Sleep Ubuntu with a Single Click	274
228. Delete Files Rather Than Trash Them	275

229. Yank a USB Stick Even If You're Told You Shouldn't . . .	276
230. Rename Many Files at Once (aka Bulk Rename)	276
231. Get an Alternative Media Player	278
232. Compare Two Files to See Whether They're Different . . .	282
233. Use the Mouse at the Virtual Console (complete with Copy and Paste)	282
234. See a Progress Display as the Desktop Loads	283
235. Get Free-of-Charge Ubuntu CDs	284
236. Make the GNOME Terminal Window Translucent	284
237. Automate the Downloading and Installation of New Theme Components	285
238. Burn Ubuntu CD Images (ISOs) Using Windows—for Free	286
239. Quickly Create Links to Files, Folders, and/or Appli- cations	287
240. Monitor CPU Usage	288
241. See Whenever Caps Lock Is Active	289
242. Make Files and Folders Entirely Private	289
243. Get Quick Access to Stuff You're Working On	290
244. Insert Command-Line Output and Files into the Clip- board	291
245. Have a Cow Talk to You	292
246. Get Notified When New Mail Arrives	292
247. Increase Output "Remembered" by GNOME Terminal . . .	293
248. Use Ubuntu's Version of Microsoft Paint	294
249. Have OpenOffice.org Save in Microsoft Office Format by Default	294
250. Password-Protect and Encrypt Files	295
251. Add Notes to Any File/Folder	299
252. Encrypt Files So That Only the Recipient Can Open Them	300
253. See Your File-Browsing History	301
254. Define Your Own Menu Shortcut Keys	301
255. Always Know Your IP Address	302
256. See the Size of Files/Folders on the Desktop	303
257. View Technical Details of Any Multimedia File	303
258. Convert PDFs and Images to Flash Slideshows	304
259. Create an Alias to Save Typing Long Commands	305
260. Send Genuine Smileys in Your Emails	306
261. Add an "Open in terminal" Option to Nautilus's Right- Click Menu	307

262. Make Windows Bootable If Things Go Wrong During Ubuntu Installation	307
263. Edit the Name and Artist Information of MP3 Files	308
264. Never Touch the Mouse While Using Ubuntu (Well, Almost)	309
265. Alter Image Viewer's Zoom Speed	310
266. Install Skype	310
267. Arrange Output into Columns	311
268. View Images Without a Graphical Environment	312
269. Synchronize Files Between a Laptop and Desktop PC	312
270. Rename Files Quickly	316
271. Have sudo Insult You	316
272. Make Nautilus Display "Traditional" File Permissions	317
273. See the GNOME Fish	318
274. Use Desktop Widgets	319
275. Read E-books	321
276. Make (Almost) Any Wifi Card Work with Ubuntu	321
277. Connect to the Remote Desktop of a Windows Vista Computer	326
278. Use Ubuntu on Your Games Console	327
279. Use a "Legal" MP3 Codec	328
280. Use Look-a-Likes of the Microsoft Fonts	328
281. Play Old MS-DOS Games	329
282. Install Google Applications	330
283. Install MS Comic Sans-Style Fonts	334
284. Use Alternative Office Applications	334
285. Have the Firefox Robot Talk to You	337
286. Back Up Your Data	337
287. Use the Ubuntu Install CD as a General-Purpose Partitioning Tool	342
288. Give Old Macintosh Computers a New Lease on Life	342
289. Use Absolutely Any Picture as an Icon	343
290. Install the GNOME Wallpapers	343
291. Zoom In for More Info in Nautilus	344
292. Play MP3/Ogg Files at the Command Line	344
293. Optimize Ubuntu's Performance	345
294. Tweak Ubuntu into Oblivion	346
295. Do Just About Anything to a File by Right-Clicking It	348
296. Get Notified of New Gmail Messages	351
297. OCR Scanned Text	352
298. Use Ubuntu's Movie Player to Watch YouTube Movies	354

299. Turn Your Desktop into Your /home Folder	354
300. Avoid Programs Quitting When the Terminal Is Closed	355
301. Allow Terminal Server Client to Access VNC Desktops .	355
302. Search All of Ubuntu's "Supported" Software	356
303. Install Windows on a Computer That Has Ubuntu on It	356
304. Turn Your Computer into a Egg Timer	360
305. Create a Portable USB Stick Installation of Ubuntu . .	360
306. Enhance the Copy and Paste Clipboard	364
307. Be Told When Your Tea Has Brewed	366
308. Avoid Bad Formatting When Viewing OpenOffice.org Files on Windows	366
309. Fix USB Key Sticks That Wrongly Report They're Full .	367
310. Use Ubuntu's Built-in Download Manager	368
311. Avoid an F-Spot Startup Error	369
312. Record Your Desktop	370
313. Take Screenshots in Any Format	371
314. Trace Network Routes	371
315. Automatically Scroll PDF Files	372
Index	373

The Pragmatic Bookshelf

The Pragmatic Bookshelf features books written by developers for developers. The titles continue the well-known Pragmatic Programmer style and continue to garner awards and rave reviews. As development gets more and more difficult, the Pragmatic Programmers will be there with more titles and products to help you stay on top of your game.
