

**GRAPHQL
FOR
RAILS
DEVELOPERS**

RYAN BIGG

GraphQL for Rails Developers

Build a GraphQL API for Your Rails App

Ryan Bigg

Table of Contents

Preface	2
About this book	3
What is GraphQL?	3
Why GraphQL?	6
Roadmap	10
1. Getting started with GraphQL	13
1.1. Creating a new Rails application	13
1.2. Adding RSpec	14
1.3. Adding the GraphQL gem	15
1.4. Using our GraphQL schema	18
1.5. How the schema fits together	20
2. Querying with GraphQL	23
2.1. Listing repositories through GraphQL	24
2.2. Showing an individual repo	34
2.3. Adding a custom field	38
3. Working with associations	43
3.1. Creating a category model	43
3.2. Retrieving a single category using GraphQL	45
3.3. Resolving repositories for a category	48
3.4. Resolving categories for a repository	51
3.5. Configuring a maximum query depth or complexity	56
4. Pagination	59
4.1. Creating the review model	59
4.2. Using the connection type to show reviews	60
4.3. Setting a maximum page size	67
5. Union types	69

5.1. Setting up the models	70
5.2. Testing union types	72
5.3. Using union types for errors	76
5.4. Fixing up our tests	81
5.5. Summary	85
6. Mutations	88
6.1. Comparing Queries & Mutations in GraphQL	88
6.2. Creating reviews through a mutation	90
6.3. Updating a review	96
6.4. Deleting a review	99
6.5. Restricting review ratings with enums	102
6.6. Adding mutations for categories	107
6.7. Mutations with the same class name will conflict	110
6.8. Exercises for the reader	113
7. Union types for validations	115
7.1. Setting the stage for validations	116
7.2. Adding a validation error type	119
7.3. Handling validation errors	123
8. Authentication	127
8.1. Creating a user model	127
8.2. Signing up users	129
8.3. Handling invalid signups	134
8.4. Logging in	138
8.5. Using tokens for authentication	145
8.6. Associating reviews to users	151
8.7. Tidying up authenticated GraphQL calls	156
8.8. Fixing up the review tests	158
8.9. Summary	159
9. Preventing N+1 queries	161
9.1. Repos, reviews and users	162

9.2. DataLoader	166
10. Using GraphQL Types in the Frontend.....	169
10.1. Adding GraphQL Codegen to our project.....	170
10.2. Generating and using our first types	173
10.3. Fetching a single repository	177
10.4. Querying deep into TypeScript	180
10.5. Extracting deep types from a query.....	184
10.6. Automatic types for mutations	186
10.7. Conclusion	188
